

In the Specification

Replace the paragraphs at page 5, lines 8-14 with the following paragraphs:

--As shown in Figs. 3 and 4, the receptacle comprises a substantially stiff outer bottle 6 and an inner bag 7 resting thereon, which is made of soft plastic material. The outer receptacle has a reduced neck portion 9 and a shoulder 10.

As schematically shown in Figs. 3 and 4, the saw blade 3 is advanced in the direction of an arrow 8 thorough the reduced neck portion 9 of the wall of the outer bottle 6, adjacent the shoulder 10. After having passed through the wall of the outer bottle 6, in which process a slit-shaped opening is formed in the wall of the outer bottle 6, the saw blade impinges on the inner bag 7 which yields inwards without being damaged. --
